

Matlab Workshop

CSIR – National Institute for Interdisciplinary Science and Technology (NIIST)

April 27, 2022

Contents of the Workshop

Session 1

1 Introduction to Matlab

- 1.1 Basics
- 1.2 Command Window
- 1.3 Variables and Workspace
- 1.4 Basic Plotting

2 Introduction to Matrix operations

- 2.1 Vector operations
 - 2.2 Arithmetic operations
 - 2.3 Linear Equations
 - 2.4 Eigen values and vectors
-

Session 2

3 Scripts and Functions

3.1 M-file scripts with example

3.1.1 Control Flow and operators

3.1.2 Reading-Writing files

3.2 M-file functions with example

4 Engineering Applications

4.1 Solving Algebraic equations - multiple methods

4.2 Solving ODEs

4.3 Numerical Integration

4.4 Curve Fitting

5 Simple GUI tricks

Pre-requisites

1. Working system with matlab installed
2. Basic mathematics
